Presentation for the
Women Techsters Bootcamp 5.0 2026
by Tech4Dev

// INDIVIDUAL CONTRIBUTION DETAILS — PART 1 OF 2

Team Member Contributions

Tasneem Mahomed

■ HIGHEST

Led the full technical build of the project. Designed and developed the complete game including all 5 levels, the AI Behavioural Analysis Engine, UI/UX design, HUD, timer, badges, and leaderboard. Created the logo, PM scope infographic, project proposal PDF, GitHub repository, HTML browser version, mobile responsive version, contributions spreadsheet, team register, and all project documentation. Conducted a full team walkthrough covering how the game was built and how the full system functions. Taught the team the basics of coding, explaining technologies used including React and Node.js, and guided members on how to prompt AI tools correctly and effectively. Assisted in building the official QA Testing questionnaire for the PM team. Consistently available across all channels, responded to every request, accommodated every change, and drove the project to completion from start to finish.

Oyedunmade Mariam Damola

■ HIGHEST

Served as Group Representative throughout the entire project. Organised and chaired all group meetings, posted all updates across team channels, managed group admin, communicated all deadlines and expectations, followed up on inactive members and coordinated the final submission. Worked closely with the technical lead, consistently reviewing and confirming that all information, details, and documentation being produced were accurate and correctly represented the group. Provided key input and approvals at critical stages to ensure final deliverables aligned with what the group agreed on. Provided consistent strong leadership that kept the entire group aligned, motivated, and on track from the first day through to completion.

Osazee Osaghae

■ MEDIUM

Created and managed the Project Management sub-group. Coordinated PM members and their responsibilities and remained consistently active across all channels. Reached out directly to the technical lead to establish collaboration from the very beginning and ensured that all information and requirements from the PM side were clearly communicated. Acted as a key bridge between the PM team and the technical lead, making sure the technical lead always had what she needed. Reviewed and confirmed the project proposal and communicated PM deliverables to the team throughout.

Alinafe Milley Manyamba

■ MEDIUM

Actively and consistently participated throughout the project across all available channels. Contributed ideas, helped coordinate members, attended all meetings, engaged in discussions and supported the group from the very first day through to completion.

Njemanze Adadobi

■ MEDIUM

Proposed the original phishing project idea that evolved into the full Cyber Shield concept. Actively participated throughout across all available channels, contributed to all discussions, helped manage new member requests and attended meetings consistently from start to finish.

Agnes Asante

■ MEDIUM

Actively present across all available channels throughout the entire project. Played a consistent and valuable role in keeping the team's spirit and morale high. Regularly provided encouragement and positive reinforcement to teammates, particularly to those working hardest behind the scenes. Offered feedback and acknowledgement on work being produced which helped motivate the team during a demanding project. Helped with member outreach, verified new joiners and attended meetings. Her consistent positivity was a genuine contribution to the team's ability to keep going and finish strong.

Bello Fathia Ayomide

■ MEDIUM

Actively participated in discussions across all available channels, asked about tasks and followed up on progress throughout the project. Maintained a positive and encouraging presence and contributed ideas consistently from start to finish.

Dorcas Johnson

■ MEDIUM

Participated in group discussions across available channels, tested the game and raised a concern regarding collaborator access on the project repository. Contributed ideas throughout the project.

// INDIVIDUAL CONTRIBUTION DETAILS — PART 2 OF 2

Team Member Contributions

Tumeka Dyakopu

■ LOW

Attempted to create a logo for the team and although a different logo was selected, her design was not wasted. Her logo artwork was used as a background element across several slides in the final presentation. Tested the game and asked about meeting times across available channels. Missed one meeting due to connectivity issues but followed up afterwards.

Daramola Opeyemi Oyindamolami

■ LOW

Submitted student details, attended one meeting and contributed minimally to group discussions across available channels.

Chibuzor Stella Bekee

■ LOW

Submitted student details and shared the project deliverables list across available channels. Limited engagement beyond that point.

Muhammad Hafsat

■ LOW

Submitted student details and apologised for missing a meeting via available channels. Limited engagement beyond that point.

Annie Apatsa Mwale

■ MINIMAL

Joined the team's communication channels one day before the submission deadline with no prior participation in any meetings, discussions or tasks. Submitted student details only. Made no contribution to the concept, planning, development or execution of the project. When the project was completed and the team needed feedback and QA testing, this member was available to participate but had not demonstrated engagement or commitment at any earlier stage despite having had the opportunity to do so across all available channels.

Odumade Aishat Abiola

■ MINIMAL

Had to be manually added to the team's channels by another member after reaching out via available communication methods. Joined very late and confirmed Group 45 membership only after direct follow up from another team member. All communication sent was solely to confirm identity and submit details. Made no contribution to the concept, planning, development or execution of the project. When the project was completed and the team needed feedback and QA testing, this member was available to participate but had not demonstrated engagement or commitment at any earlier stage despite having had the opportunity to do so across all available channels.

Machiridza Tinotenda

■ MINIMAL

Present across the team's communication channels from the early stages but all messages sent were limited to asking about meeting times. No ideas contributed, no tasks completed, no meetings confirmed attended, and no recorded involvement in any aspect of the project concept, planning or execution. When the project was completed and the team needed feedback and QA testing, this member was available to participate but had not demonstrated engagement or commitment at any earlier stage despite having had the opportunity to do so across all available channels.

Purine Wambita

■ MINIMAL

Missed the first group meeting entirely. Communication throughout the project was limited mostly to asking about meeting times across available channels. No recorded contribution to any deliverables, discussions or tasks. When the project was completed and the team needed feedback and QA testing, this member was available to participate but had not demonstrated engagement or commitment at any earlier stage despite having had the opportunity to do so across all available channels.

// THE PROBLEM

Why Does This Matter?

Online scams are becoming increasingly sophisticated. The human factor remains the weakest link in cybersecurity — and most training is boring, passive, and forgettable.

FINANCIAL LOSSES

Cybercrime costs Africa billions annually through phishing, fraud and identity theft.

HUMAN ERROR

Over 70% of cyber attacks exploit human behaviour — not technical vulnerabilities.

INEFFECTIVE TRAINING

Most awareness training is static, theoretical, and fails to create lasting behaviour change.

"People learn best through realistic, high-stakes experience — not slideshows."

CYBER SHIELD

// OUR SOLUTION

What Is Cyber Shield?

An AI-powered, gamified cybersecurity escape room that builds genuine immunity against scams through simulation.

PHISHING SIMULATIONS

Realistic email, WhatsApp & login scam scenarios.

ESCAPE ROOM GAMEPLAY

5 escalating levels with countdown timer pressure.

AI BEHAVIOURAL ENGINE

Tracks decisions and computes your Human Risk Score.

REAL-TIME FEEDBACK

Instant explanation after every decision with tips.

BADGES & LEADERBOARD

Gamified progression system with achievements.

VIRTUAL STAKES

\$50,000 in virtual money at risk — decisions have real cost.

CYBER SHIELD

// GAME DESIGN

5-Level Escape Room

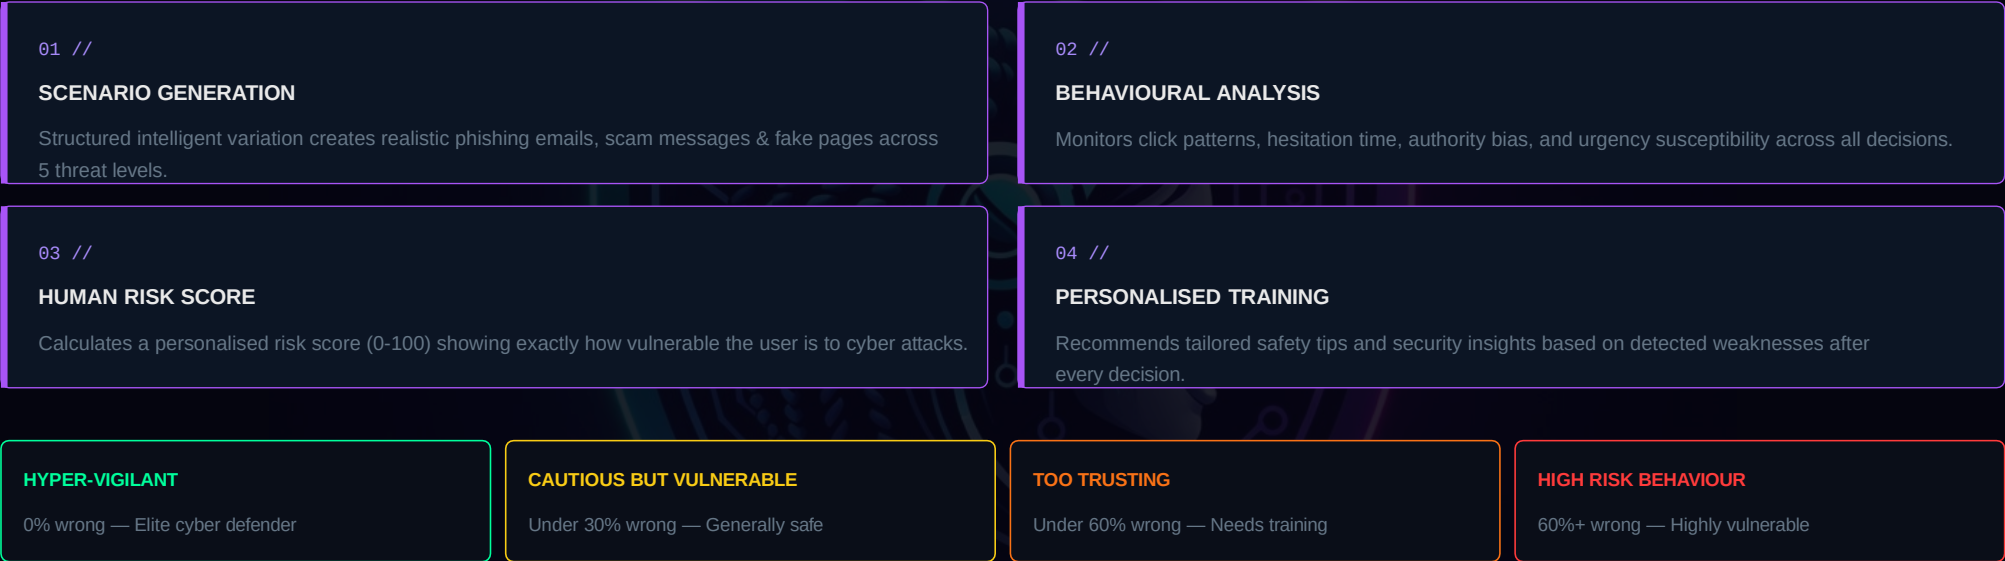

Each level presents a realistic scenario UI with timer pressure, multiple choices, and consequences.

LVL 01	PHISHING EMAIL Fake PayPal suspension notice		45 sec
LVL 02	FAKE WHATSAPP 'Hi Mum' impersonation scam		35 sec
LVL 03	FAKE LOGIN PAGE Fraudulent bank portal		40 sec
LVL 04	VISHING CALL Tax authority arrest threat		30 sec
LVL 05	MULTI-STEP ATTACK Fake recruitment scam		55 sec

// AI COMPONENT

Behavioural Analysis Engine

The core AI system that tracks, analyses, and scores every player decision in real time.

// IMPACT & SDG ALIGNMENT

Who Does This Protect?

COMPANIES

Staff cybersecurity awareness and phishing resistance training.

SCHOOLS

Digital safety education integrated into curricula.

FAMILIES

Child online protection & parental scam guidance.

ELDERLY

Accessible scam awareness for the most vulnerable.

SDG 4

QUALITY EDUCATION

Digital literacy through interactive, gamified learning.

SDG 9

INNOVATION

AI-driven cybersecurity training innovation.

SDG 16

PEACE & JUSTICE

Reducing cybercrime by strengthening human defences.

// AI TOOLS & RESEARCH METHODOLOGY

How We Built This

This project was built using a combination of AI tools, combined research, and collaborative development — each contributing a unique strength to the final product.

CLAUDE (ANTHROPIC)

PRIMARY DEVELOPMENT AI

Frontend development, game logic, Behavioural Analysis Engine, UI/UX design, documentation, and presentation structure.

CHATGPT (OPENAI)

CONTENT & IDEATION

Brainstorming scam scenarios, refining problem statements, drafting initial proposal content and game narrative ideas.

GOOGLE GEMINI

RESEARCH & VALIDATION

Cross-referencing cybersecurity statistics, validating scam patterns, and supporting SDG alignment research across Africa.

GOOGLE RESEARCH

DATA & STATISTICS

Sourcing cybercrime statistics, real-world scam examples, and best practices in cybersecurity awareness training.

COMBINED AI + HUMAN INTELLIGENCE APPROACH

Multiple AI tools were used collaboratively alongside team research and human insight — ensuring accuracy, realism, and impact.

// FUTURE ROADMAP

What's Next?

PHASE 1

Current: 5-level game with Behavioural Analysis Engine — fully functional

PHASE 2

Real-time AI via Claude API for dynamic scenario generation

PHASE 3

Multiplayer competitive mode — teams compete in real time

PHASE 4

School curriculum integration + digital certificate system

PHASE 5

React Native mobile app — available on iOS & Android

TEAM

// CLOSING STATEMENT

HUMAN FIREWALL

CHALLENGE ACCEPTED

"Cyber Shield doesn't just detect scams — it trains users to resist them."
