Women Techsters Bootcamp 5.0 2026
by Tech4Dev

// GROUP 45 — CONTRIBUTIONS

Team Member Contributions

FULL NAME	CONTRIBUTION
Tasneem Mahomed	Built and developed the full Cyber Shield game — all 5 levels, the AI Behavioural Analysis Engine, the HUD, timer, badges, leaderboard, and
Oyedunmade Mariam Damola	Served as Team Representative. Managed all group updates, coordinated team communications on Teams, and ensured the group stayed on track
Osazee Osaghae	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Alinafe Milley Manyamba	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Muhammad Hafsat	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Bello Fathia Ayomide	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Tumeka Dyakopu	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Machiridza Tinotenda	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and engage in meetings.

FULL NAME	CONTRIBUTION
Cynthia Agwuncha	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Njemanze Adadobi	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Dorcas Johnson	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Juliet Chidiogo Okonkwo	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Chibuzor Stella Bekee	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Agnes Asante	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and
Purine Wambita	Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and engage in meetings.

Helen Amuche Okeke Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and engage in meetings.

Daramola Opeyemi Oyindamolami Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and engage in meetings.

Odumade Aishat Abiola Actively participated throughout the project, contributed ideas and input, helped shape the game concept, and made consistent effort to attend and engage in meetings.

Women Techsters Bootcamp 5.0 2026
by Tech4Dev

// THE PROBLEM

Why Does This Matter?

Online scams are becoming increasingly sophisticated. The human factor remains the weakest link in cybersecurity — and most training is boring, passive, and forgettable.

FINANCIAL LOSSES

Cybercrime costs Africa billions annually through phishing, fraud and identity theft.

HUMAN ERROR

Over 70% of cyber attacks exploit human behaviour — not technical vulnerabilities.

INEFFECTIVE TRAINING

Most awareness training is static, theoretical, and fails to create lasting behaviour change.

"People learn best through realistic, high-stakes experience — not slideshows."

CYBER SHIELD

// OUR SOLUTION

What Is Cyber Shield?

An AI-powered, gamified cybersecurity escape room that builds genuine immunity against scams through simulation.

PHISHING SIMULATIONS

Realistic email, WhatsApp & login scam scenarios.

ESCAPE ROOM GAMEPLAY

5 escalating levels with countdown timer pressure.

AI BEHAVIOURAL ENGINE

Tracks decisions and computes your Human Risk Score.

REAL-TIME FEEDBACK

Instant explanation after every decision with tips.

BADGES & LEADERBOARD

Gamified progression system with achievements.

VIRTUAL STAKES

\$50,000 in virtual money at risk — decisions have real cost.

CYBER SHIELD

// GAME DESIGN

5-Level Escape Room

Each level presents a realistic scenario UI with timer pressure, multiple choices, and consequences.

LVL 01	PHISHING EMAIL Fake PayPal suspension notice		45 sec
LVL 02	FAKE WHATSAPP 'Hi Mum' impersonation scam		35 sec
LVL 03	FAKE LOGIN PAGE Fraudulent bank portal		40 sec
LVL 04	VISHING CALL Tax authority arrest threat		30 sec
LVL 05	MULTI-STEP ATTACK Fake recruitment scam		55 sec

// AI COMPONENT

Behavioural Analysis Engine

The core AI system that tracks, analyses, and scores every player decision in real time.

// IMPACT & SDG ALIGNMENT

Who Does This Protect?

COMPANIES

Staff cybersecurity awareness and phishing resistance training.

SCHOOLS

Digital safety education integrated into curricula.

FAMILIES

Child online protection & parental scam guidance.

ELDERLY

Accessible scam awareness for the most vulnerable.

SDG 4

QUALITY EDUCATION

Digital literacy through interactive, gamified learning.

SDG 9

INNOVATION

AI-driven cybersecurity training innovation.

SDG 16

PEACE & JUSTICE

Reducing cybercrime by strengthening human defences.

// AI TOOLS & RESEARCH METHODOLOGY

How We Built This

This project was built using a combination of AI tools, combined research, and collaborative development — each contributing a unique strength to the final product.

CLAUDE (ANTHROPIC)

PRIMARY DEVELOPMENT AI

Frontend development, game logic, Behavioural Analysis Engine, UI/UX design, documentation, and presentation structure.

CHATGPT (OPENAI)

CONTENT & IDEATION

Brainstorming scam scenarios, refining problem statements, drafting initial proposal content and game narrative ideas.

GOOGLE GEMINI

RESEARCH & VALIDATION

Cross-referencing cybersecurity statistics, validating scam patterns, and supporting SDG alignment research across Africa.

GOOGLE RESEARCH

DATA & STATISTICS

Sourcing cybercrime statistics, real-world scam examples, and best practices in cybersecurity awareness training.

COMBINED AI + HUMAN INTELLIGENCE APPROACH

Multiple AI tools were used collaboratively alongside team research and human insight — ensuring accuracy, realism, and impact.

// FUTURE ROADMAP

What's Next?

PHASE 1

Current: 5-level game with Behavioural Analysis Engine — fully functional

PHASE 2

Real-time AI via Claude API for dynamic scenario generation

PHASE 3

Multiplayer competitive mode — teams compete in real time

PHASE 4

School curriculum integration + digital certificate system

PHASE 5

React Native mobile app — available on iOS & Android

TEAM

// CLOSING STATEMENT

HUMAN FIREWALL

CHALLENGE ACCEPTED

"Cyber Shield doesn't just detect scams — it trains users to resist them."
